Eliminate Error-Prone Paper-Handling

Patient care is the end result of our healthcare management system, but it's sometimes difficult to see the proverbial forest through the trees when you're shuffling paper from one desk to another. AutoStore can help make your patients the number one priority again, by streamlining the capture, process and storage of paper and electronic documents.

AutoStore uses scanners and multifunction printers (MFPs) to digitize patient, medical, administrative, and regulatory records that pass through your office on a daily basis. Once digitized, AutoStore saves the documents in text searchable formats, in any repository – and all with a single touch of a button on your MFP. That's where AutoStore comes in. AutoStore is a scalable business automation solution that uses existing Multifunction Printers (MFPs) to scan, index, and process paper and electronic documents.

AutoStore can dramatically reduce the cost and time spent on processing and archiving information, from the most complex of forms to password-protected classified documents.

Key Business Benefits

- Reduce the cost of records processing by removing manual steps needed to handle information.
- Create efficiencies of scale with one secure electronic file for patient information.
- Improve patient safety by reducing errors created from manual data entry.
- Save time with instant access to text-searchable records across departments and facilities.
- Expedite billing cycles using fully digitized EOBs.
- Improve patient relations with real-time access to records and billing information.
- Increase tracking and security.

- \$250 billion is spent processing healthcare transactions each year. ¹
- 86% of mistakes made in the healthcare industry are administrative. ²

These mistakes can be deadly as well as costly: illegible prescriptions, notes placed in wrong records, patients misidentified...Many hospitals and clinics still rely on error-prone and expensive manual paper-handling.

Key Product Features

- Capture paper or electronic patient records and documents, index and store them in PDF, Microsoft Office and other formats for easy retrieval.
- Scan and distribute records and documents as outbound email and fax.
- Scan patient, medical, lab and radiology reports directly to a PC, database and printer.
- Extract data from medical forms and export them to business applications and document management systems.
- Improve digitized image quality of any scanned or electronic document prior to archival.
- Automatically send email notifications upon completion of processing and archival.

Patient Records Management

Scan medical information, including discharge instructions and follow-up care, and make it available across departments, facilities, staff and physicians.

Compliance

AutoStore allows you to ensure the compliance of information throughout its lifecycle using security controls and audit trails that meet stringent HIPAA requirements.

Accounts Payable

The scanning and processing features of AutoStore will minimize processing errors, expedite EOBs, and reduce duplicate, inaccurate or unauthorized payments.

Claims Processing

Extract information from insurance forms and export it into patient records or a variety of document management systems. Use AutoStore's image enhancement features to clean up hard to read images and improve image quality.

Mailroom Processing

Streamline workflow and reduce lost mail by scanning, indexing and storing paper mail that comes into the mailroom. AutoStore creates efficiencies that will benefit the entire health facility from customer service to accounts payable.

"The beauty of this customized solution is the ease-of-use for the hospital staff."
